

PRESS RELEASE

Aqua Metrology Systems Poised for Ambitious Growth Under Guidance of New CFO

SUNNYVALE, Ca. - 16 February 2017

[Aqua Metrology Systems](#) (AMS), a leader in online analytical instrumentation for the detection of water contaminants has appointed Felipe Carvalho as Chief Financial Officer (CFO).

As CFO, Felipe will lead the company's fund raising activities aimed at accelerating the growth of the company. Felipe will also play an active role in developing AMS's international presence. Prior to joining AMS, Felipe held senior positions with Macquaire Group and BTG Pactual where he gained extensive international banking experience in mergers and acquisitions and investing in infrastructure, utilities, renewables and commodities sectors. Felipe has a degree in Economics from Ibmec in São Paulo and a Masters Degree with Distinction in Finance and Economics from the London School of Economics.

Commenting on this appointment, Rick Bacon, CEO of AMS said, "Felipe joins us at a time when the company's market-leading technologies for trihalomethanes, arsenic, chromium, selenium and other trace metals are driving innovation in the field of online monitoring. Felipe brings a wealth of experience to his role as CFO, he will propel our ambitious growth plans in the United States and abroad."

About AMS

[Aqua Metrology Systems Ltd.](#) (AMS) is the leader of online and offline analytical instrumentation for the detection of water contaminants, specifically disinfection by-products and trace metals, across municipal and industrial sectors. We believe high frequency data is essential for effective design, project validation, and process control. As a result, our technical solutions are designed to provide reliable and repeatable information on water quality contaminants through continuous, real-time monitoring. The real-time environmental data we provide helps drive smart decisions.
